

As a student, I want to be able to access a virtual reality lab that allows me to explore scientific concepts and phenomena in a more immersive and interactive way. Acceptance Criteria: The virtual reality lab should be easily accessible and compatible with commonly used VR devices, such as Oculus Rift, HTC Vive, or Google Cardboard. The lab should provide a variety of simulations and experiments that cover a range of scientific disciplines, such as physics, chemistry, and biology. The lab should offer interactive and hands-on activities that allow students to manipulate objects, conduct experiments, and observe phenomena in a realistic 3D environment. The lab should be supported by instructional materials, such as lesson plans, guides, and assessments, that are aligned with educational standards and provide clear learning objectives.
