

As an administrator, I want to be able to implement an AI-powered Chatbot that can answer common student questions and provide support, so that we can improve access to information and reduce administrative workload. Acceptance Criteria: The AI-powered chatbot should be able to handle a wide range of common student queries and provide accurate and helpful responses. The chatbot should be available 24/7 to ensure that students have access to information and support outside of regular office hours. The chatbot should be easy to use and integrate seamlessly with the school's website or communication platform. The chatbot's performance should be regularly monitored and evaluated for effectiveness and accuracy, with necessary updates or improvements.
