

As a teacher, I want to be able to create and administer online quizzes that adapt to each student's ability level, so that I can provide personalized feedback and support. Acceptance criteria: The online quiz platform should be able to adjust the difficulty level of questions based on the student's previous answers and performance to provide a personalized experience. The platform should have a feature that allows teachers to create and assign quizzes to their students, and the students should be able to access them easily. The quiz platform should have an automatic grading system that provides instant feedback to students on their answers and overall performance. The quiz platform should have a feature that enables teachers to review and analyze the performance data of their students on a per-quiz and per-question basis, to identify areas for improvement and assess their engagement and understanding.
